

POND AERATION & BLANKET WEED

1. Koi Air Pumps

It is widely recognised that good aeration is essential for good pond water conditions and healthy fish. Good aeration stops pond water stagnation, prevents fish dying from lack of oxygen, helps sick fish recover, improves waste breakdown and aids filtration.

Koi Air is a reliable way of supplying aeration to ponds and filters – its robust rubber diaphragm is durable and easy to replace.

Koi Air pumps are specifically designed for use with larger ponds, where the ability to pump to several metres depth, with a number of air stones is important.

Koi Air comes complete with a multi airline outlet.

Amphibious Pumps - Technical Specification

MODEL	OUTPUT (L/MIN)	MAX DEPTH (CM)	MAX. 50MM AIRSTONES AT 2M	MAX. PRESSURE	POWER (WATTS)	CODE
Koi Air 25	25	220	6	0.028	20	1010825
Koi Air 50	50	300	12	0.032	40	1010832
Koi Air 65	65	350	14	0.040	60	1010849

2. Maintenance Kits

Complete annual maintenance spares set.

DESCRIPTION	CODE
Koi Air 25 Master Spares Kit	1019941
Koi Air 50/65 Master Spares Kit	1019938

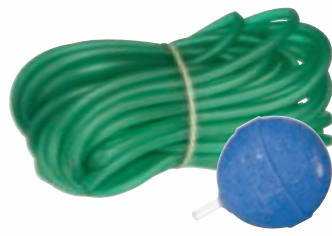

3. Pond Air

Air pump system for creating a healthy environment in smaller ponds.

Pond Air was the first specific pond air pump and has proven quiet and reliable in use over many years.

Unlike many smaller pond air pumps - Pond Air is specifically designed to operate in the rigours of the pond environment and pumps air up to 100 metres and to 4-ft depth.

DESCRIPTION	CODE
Pond Air 1 for ponds up to 2250 litres	2871
Pond Air 2 for ponds up to 4500 litres	2872
Spares Kit for Pond Air 1	2873
Spares Kit for Pond Air 2	2874
Pond Air 50 mm Airstone	2875

ELECTRONIC BLANKET WEED CONTROLLER

A newly designed Electronic Blanket Weed Controller that compliments the new Powersafe range of switch boxes.

Advanced electronics in a thoroughly modern and convenient to install enclosure at a price that will ensure volume sales for our tried and tested solution to blanket weed.

- For long lasting effective control of blanket weed
- Multi frequency processor ensures continued control
- Very low running costs
- Flashing active frequency generation lights
- Easy to install
- Integrated wall or post mounting bracket with fittings

4. Electronic Blanket Weed Controller

Maximum pond size	23000ltr/5060 gal
Wattage	1.6w
CODE	1040242
