

POND FILTRATION - Cleanflo

CleanFlo Filters

A range of high quality, classic external box filters designed for ponds up to 2000 gallons. Cleanflo filters feature:

- High flow capability for reduced maintenance
- Drainage tap or gate valve - for easy effective cleaning
- Stepped inlet hose tails - to fit with a range of hose diameters
- Spray bar inlets to ensure good aeration and water distribution over the media
- Overflow pipes - to ensure the filters do not overflow if the media is blocked

Large quantity of high tech media

- Multiple layers of different grades of high surface area reticulated foam for efficient mechanical filtration
- Either Flocor or Aquarock media to give exceptional surface area for efficient biological purification
- Outlets on models 500 - 2000 will accept standard push-fit pipe work

1. Bio 300

Efficient good value external filter suitable for mechanically and biologically filtering ponds up to 300 gallons.

Bio 300	1011808

2. Pond Clarifiers

Blagdon's ultraviolet pond clarifiers (UPCs) are easy to install and are available in 10, 15 and 25 watt options to suit ponds up to 20,000 litres.

Benefits of the Blagdon UPC's include:

- A unique lamp removal system to reduce the chance of damaging either the germicidal lamp or the surrounding quartz sleeve
- Easy to retro-fit into existing pond filtration set ups with its multiple hose fitting options
- Efficient algae kill due to vortex flow around the UV tube
- Unique mounting clips for easy installation
