

# SWITCH BOXES & CONNECTORS

## POWERSAFE SWITCH BOXES

### 2, 3, 4 AND 5 SWITCH MODELS

A complete re-design ensures that the new range of Powersafe switch boxes are not only the best quality switch boxes on the market with unique innovative features, but also the best value.

Designed for safe pond-side and garden electrical connections

#### Extra Safe

- Each Switch box has at a glance unique power on and power standby indicator lights
- Individually fused outlets
- Weatherproof for outdoor use
- Clear power application identity labels for each switch included
- Simple to install
- Large housing with simple to remove circuit board for easier wiring
- Integrated wall or post mounting bracket and fittings included

#### POWERSAFE SWITCHBOXES

The Powersafe range of switchboxes have been specifically designed to protect your pond equipment from failure. Each individual double pole switch gives total electrical isolation when switched off. Each switch features the unique at a glance power status indication system, which enables quick identification of power on, power on standby and power failure due to a blown fuse. Each switch has an individual fuse to provide overload protection ensuring that even if one or more items of equipment fail, the other essential pond equipment is still able to function.

#### MAXIMUM SAFETY FOR YOU & YOUR FISH

Unique at a glance power status light indication system

- NO LIGHT  
Switch on or off. Fuse has blown, no power.
- RED LIGHT  
Switch off, power supply on standby
- GREEN LIGHT  
Switch on, power supply active

#### PS2 Two Way Switch Box

Fused outlets for up to 1 x 1000W and 1 x 300W

Total unit capacity	1300w
CODE	1040204
